

CRUMB REMOVAL DRUM

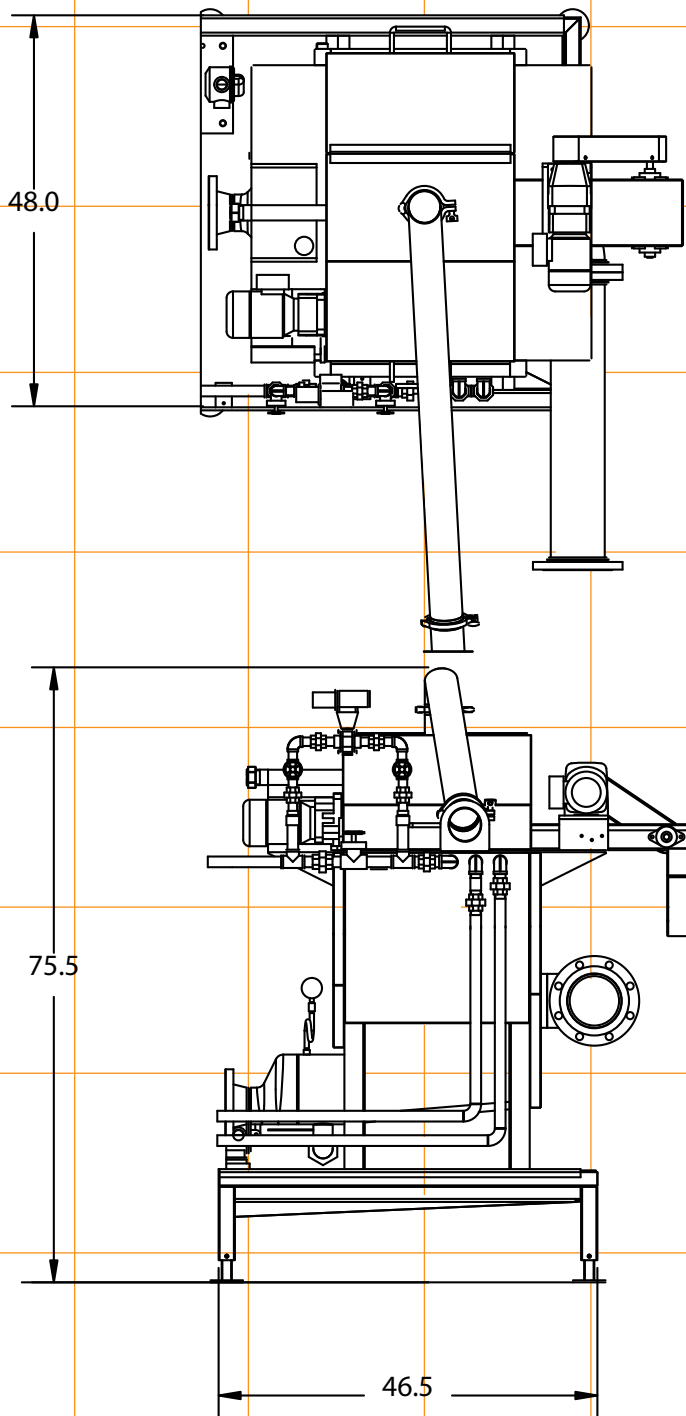

CASA HERRERA'S MOTORIZED DRUM-PRE-FILTER OPERATES BETWEEN THE FRYER AND MAIN OIL PUMP. THIS UNIT REMOVES LARGE PARTIALS FROM THE FRYER BEFORE IT REACHES THE MAIN FILTER CANISTER UNITS. THIS SYSTEM INSURES LONGER FILTRATION CYCLES BETWEEN THE MAIN FILTRATION CANISTERS.

PRODUCT FEATURES

- *Stainless steel housing, covers, mesh filter, connections, and support frame.*
- *Rotating mesh filtration drum assembly*
- *Filter Mesh designed for easy cleaning and maintenance.*
- *Continuous particle removal waste conveyor*
- *Stainless Steel Steam exhaust vent.*
- *Hinged Doors for easy access and cleaning*
- *Large inlet and outlet ports for continuous oil flow.*
